He is positioned in the foreground on the right side of the frame. The background is a bright, modern office space with large windows. Several other people are visible in the background, but they are out of focus. The lighting is soft and natural, coming from the windows.

The H.C. Bonum coaching methodology was straightforward, and we had clear objectives at the end of each session. Additionally, the program enabled me focus more on our strategic business objectives and go beyond limit. Executives seeking for career growth and development will find the program very useful."

What is coaching?

Coaching is a process of helping another individual realize their inner potential, delivering fulfilment to both the individual and the organization.

Coaching is a method of facilitating another person's learning, development, and performance in a non-directive way.

It is not advising, counselling, therapy, mentoring, training, or consulting.

When is coaching the right solution?

Coaching is a unique and effective solution when an individual:

- Needs behavioural change or emotional intelligence
- Is a high potential needing to maximize contribution to the business
- Is moving from operational to strategic management
- Is being strongly considered to take on a new role, especially a leadership or executive role
- Has to manage or adapt to change
- Has been assigned a special project expected to yield high returns

"The H.C.Bonum Coaching Program made for a significant improvement in my work-life balance as it allowed me to be more strategic in my delegation. And trusting my team by adequately preparing them and developing them to take on more challenges than they would naturally have been prepared to take on. Overall, I would recommend the program to anyone looking to build themselves and have a positive impact on their team."

What to expect from our coaching program?

It is a development process that supports clients in achieving sustainable transformation in performance through accelerated learning, a customized goal-oriented approach and an ongoing relationship and accountability partnership with a coach.

Our coaches work with individuals to

- develop greater self-awareness
- identify critical performance improvement opportunities
- create strategies for development and performance improvement to achieve the right balance of personal, professional, and organizational goals.

The program comprises a series of monthly one-hour virtual, face-to-face or telephonic sessions.

"At this time last year, I was not exactly sure what I wanted to do next. Things were fuzzy and I knew I wanted more but I couldn't exactly picture the "more" I wanted. And then my H.C.Bonum coach showed up. Now I see more possibilities than I used to and would often find myself processing thoughts the way I was coached. I don't get to experience this with many people, so when I do, I don't take it for granted. Thanks again, for helping me see the many new colors of life."

Compensation and Benefits Manager

What is the benefit of coaching?

Changing habits and creating possibilities is a process and working with a coach can dramatically increase the opportunity for success.

Coaching yields the following ROI:

- Improved performance and productivity
- Greater flexibility and adaptability to change
- Improved growth mindset and accelerated learning
- Better utilization of people, skills, and resources
- Improved leadership skills and executive presence
- Enhanced strategic thinking
